

PROTOTYPE PLANT

JFKBG CONFIGURATION

VADM George P. Nanos Jr., - Commander, Naval Sea Systems Command

DE PLANT JFK BGIT/CONNIE Y2K A SNAP SHOT

TEST EVENTS

- Conduct Y2K Compliance Tests
- Evaluate Tactical Data Link Operations
- Evaluate Battle Group Interoperability Upgrades
- Provide Major Input To Capabilities and Limitations Documents

DEMONSTRATED ABILITY TO:

- *Provide a Repeatable Controlled Environment for Evaluation of Battle Group Interoperability Problems*
- *Conduct System Level Fault Isolation of Interoperability Problems*
- *Provide a Controlled Environment to Evaluate Workarounds and Fixes*
- *Enable the Fleet to Validate Operational Tactics, Techniques and Procedures (TTP) Prior to Going to Sea*

FUTURE USES

- **BATTLE GROUP/BATTLE FORCE TEST & EVALUATION**
- **DEVELOPMENTAL ENGINEERING**
 - System Development Tests (Joint/Industry)
 - Collaborative Engineering (Joint/Industry)
- **INDUSTRY INTERFACE**
 - Industry interface to test early designs and development models without proprietary concerns, i.e., “engineer-in interoperability”
- **EXERCISES & TRAINING**
 - ASCIET
 - Joint (TMDSE)
 - Battle Group/Battle Force (OPTASK Link; BFTT)

The Mechanism to Move Joint Interoperability Forward
